# Company

**Green Seas International LTD** was established 21 years ago to meet the demand of the marine industry for ship repairs, new ship buildings, and related services, either in Romanian ports or worldwide. Also we are involved in civil and industrial steel construction.

## History

**Green Seas International LTD** is a Romanian registered company under the no. J13/1619/1999, and the Tax registration code RO12096077.

Our HQ and facilities are located near the Black Sea, on 4th Industrial Street, Constanta, Romania.

From 2003 we diversified our activity and successfully cooperated with companies involved in projects connected to offshore and aluminum industries in Norway, Sweden & Iceland. Therefore, we added to our portfolio companies such as **Alcan Alesa** from Switzerland, **Peder Halvorsen** from Norway, **Heddin** from Iceland.

In 2006 we opened a new branch to our company, located in **Garðabær, Iceland** and got involved in executions and assembling projects for industrial equipment and conveyors in aluminum plants such as **Norðurál & Isal**.

**“Our mission is to meet our clients’ needs & expectations, while delivering successful projects.”**

# Resources

We made investments in our facilities to expand our activity. We extended the production workshop and installed new types of equipment to increase the efficiency and quality of our products.

One of our greatest strengths is our qualified and experienced management team and our highly skilled professional employees.

We have **two fully equipped workshops**, a 700 sqm one and another 500 sqm one, located in Constanta, Romania, capable of taking on various scale projects. Additionally to the workshops there we have two cabinets for **sandblasting** and **painting** each of 70 cubic meter.

Both our workshops are equipped with **crane facilities** and various steel works tools & equipments like **welding machines, plasma cutters** plus various **drilling & milling machines**.

We understand that the safety and health of our people is a core determinant in ensuring the success of any project and we act accordingly. Hence, we have developed a **Safety and Environmental Management Program (SEMP)**, which is primarily a documentation and awareness

Looking up to accomplish its commercial objectives, Green Seas International is accredited by a management system of quality in conformity with **ISO 9001: 2015; ISO 14001: 2015; SR 3834-2** developed by **Germanischer Lloyd Certification GmbH**.

# Our Services

Over the last 20 years we specialized in Ship Building & Repairs, Oil & Gas projects, and Civil & Industrial Construction.

## Ship Building & Repairs

From the beginning, our activity was focused on new shipbuilding and ship repair.

As subcontractors, we participate in repairs and new shipbuilding projects in Romania as well as Southampton, Belfast, Swansea-UK, Bergen – Norway, Huelva, Sevilla – Spain.

Green Seas International Ltd. is specialized in shipbuilding and ship repairs projects like:

- Block sections confection & assemblage to any type of ship
- MMA, MIG-MAG, TIG-VIG weldings
- Dock mounting
- Steel buildings
- Rails, gangways, trestles
- Pipes confections and assemblage
- Steel – carbon and stainless steel pipe
- Electrical installation (force & command)
- Automation
- Cables tracing
- Small boat buildings
- Ship repairs

Our department has several steel fitters and welders with high qualification and a large experience certified by DNV GL, Bureau Veritas, and A.N.R. (Romanian Naval Authority).

## Oil & Gas

Our partners from the North Sea brought us a new challenge. Together we have been involved in offshore projects as fabrication of skid modules mouse holes steam boilers heat exchangers and pressure tanks.

Most of the components are made in our fabrication workshop and install by our teams on site.

## Civil & Industrial

The quality of our work is proven by a long period of cooperation with our foreign partners. Our flexibility and the experience acquired by our employees made us one of the companies involved in major local projects.

As a result of investment in our facilities, we are now able to comply with all clients' requirements, including civil and industrial construction development.

## Manpower

Being involved in shipbuilding & repairs, industrial & civil constructions, offshore oil & gas industry, a highly-skilled team is required.

Due to the high complexity of the projects we have been involved in, our manpower is under continuous training.

All our welders are certified under GL welding procedures as MMA, MIG-MAG, TIG-VIG for steel, stainless steel, aluminum.

## Health & Safety

We strongly believe that:

- Our employees deserve a safe working environment
- We are responsible for our employees' safety
- Safe conduct is a condition of employment at Green Seas International.

Our superior performance is purely based on our strong belief in the implementation of a behavior based Safety Management System.

# Safety Management System

At **Green Seas International Ltd** we believe that safety, health of personnel and community is a core determinant in ensuring the success of any project. Hence, we have developed a **Safety & Environmental Management Program (SEMP)**.

## What is a Safety & Environmental Management System?

It's a documentation and awareness program based on guidelines provided in API RP 75.

The focus is to provide a standard operating procedure and documentation in an effort to raise the awareness level of workers concerning safety and environmental issues related to the operation of onshore/offshore facilities.

*The requirement for a safe working environment are:*  
- a strong Management commitment,  
- a knowledge driven Supervisory staff,  
- dedicated Safety officers,  
- well-trained Quality & Safety oriented staff.

Every one of our employees has a personal goal of safety of each level of services in both field and shop projects. We are 100% compliant with the client's requirements, safety awareness being a priority on every job.

# Why Choose Us

We know that long-lasting partnerships are built on trust. That's why our work is driven by four core values – **Quality, Integrity, Partnership, and Safety**. From our point of view, a healthy business is based on strong values.

## Quality

One of our main goals is to deliver high-quality projects. Green Seas International is accredited by a management system of quality in conformity with ISO 9001: 2015 ; ISO 14001: 2015; SR 3834-2 developed by Germanischer Lloyd Certification GmbH.

## Integrity

Transparency, honesty, and confidentiality stay at the core of the relationship with our partners. For over 20 years, we are known as a reputable company that always meets our clients' expectations.

## Safety

Being the primary objective in our operations, our superior performance is purely based on our strong belief in the implementation of a behavior-based Safety Management System.

## Partnership

Creating strong partnerships with our clients is another goal we focus on. In such a competitive market, the reputation and the relationships you build are vital for a healthy business.
